**Re: Chimney Repair Project
Mid-Atlantic Social Security Center
300 SPRING GARDEN ST
PHILADELPHIA, PA 19123**

Continental Chimney & Engineering LLC did a great job repairing the two chimneys for the Mid-Atlantic Social Security Center in Philadelphia. The job called for welding 25" flue pipe together from the inside of the chimney. It was an impossible task but they were able to vent the flue pipe adequately to allow welding to be done from the inside the chimney. Their concern for safety was first, and everything went very smoothly with no problems.

Sincerely,
